

# Kanban in 5 min

## Issues

Manager

Scrum does not fit, there is no 'fixed' scope. I need to prioritize daily

I need to focus forward instead on the details

Engineer

I want to focus on quality and grow in my profession

## Opportunities

Managers

I make sure what we do is value adding and remove teams obstacles

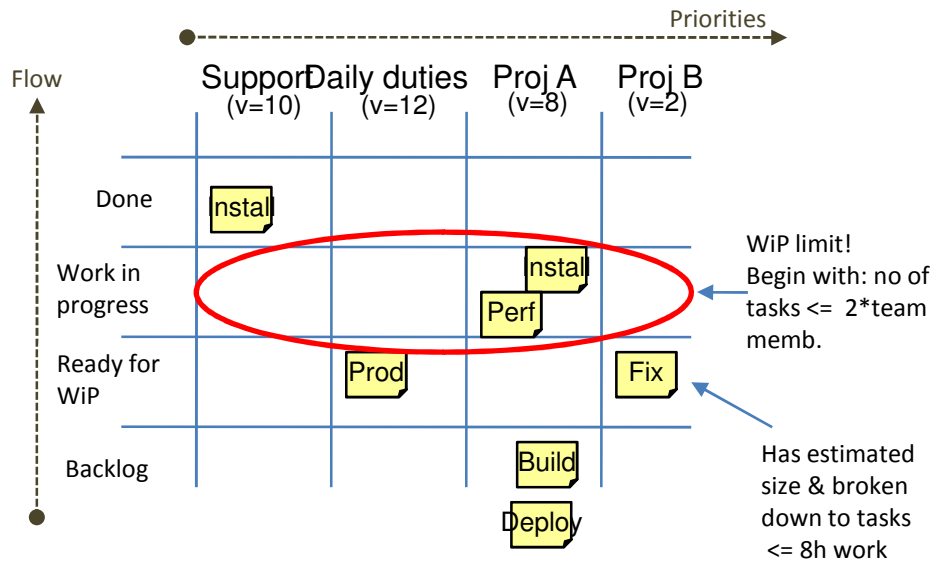

Team

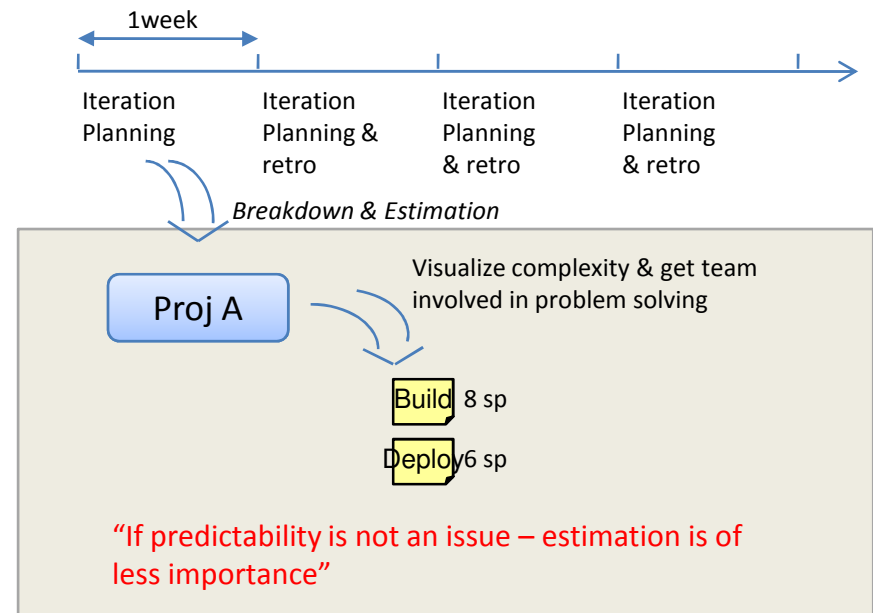

We find best solutions and guarantee flow of deliveries

## A sample Kanban board

## Timeline

# Kanban in 5 min

## Reporting & follow up

## Daily routine

1. Standup
  - What did I do yesterday
  - What will I do today
  - Any impediment stopping me
2. Prioritisation update by PO
3. Breakdown of stories to fill "Ready for work" (on need basis)

## Typical task "ready for work"

## Team roles

Responsible for end value delivered  
 Prioritises teams work  
 -But can never override Work In Progress limit  
 Manager often assumes this role

Puts team first  
 Verifies progress towards done  
 Process administrator  
 Confronts the brutal facts

## Questions?

Sometimes, it is good to have expertise handy to avoid getting stuck. Just call.
